FCC MAIL ROOM

Federal Communications Commission  
Office of the Secretary  
1919 M Street, Room 222, NW  
Washington, DC 20554

Subject: MM Docket 99-25

I am writing in approval for your proposals to license

new 1-10 watt "micropower" stations which would cover a radius of one to two miles and

new 100 and 1000 watt stations that would reach up to nine miles.

Community-oriented radio broadcasting is sorely lacking in our country and is desperately needed!

The airwaves have been stolen by corporate broadcasters who are only interested in selling their wares. The airwaves should belong to the American people! Not only to the huge corporate interests to make another buck at our expense! Where is the community music? Where is the community opinion? The Rush Limbaugh's of the airwaves do not work for the people! They work for the American and multi-national corporations.

With thanks.

Sincerely,

Shirley F. Hansen
